

## NYC DOE's Commitment to Diversity

The New York City Department of Education is committed to supporting learning environments that reflect the diversity of New York City. We believe all students benefit from diverse and inclusive schools and classrooms where all students, families and school staff are supported and welcomed. This work is essential to our vision of Equity and Excellence for all NYC students.

Diversity comes in many forms—racial background, socioeconomic status, home language, country of origin, immigration status, academic ability, special needs, religion, gender, gender expression, sexual orientation, housing status and cultural background and experience.

## Context of District 3 schools

- In District 3, we are working to ensure that students are admitted to middle schools in a way that is fair, equitable, and leads to schools that reflect the diversity of the community
- District 3 does not have any zoned middle schools
- In the 2017-2018 school year:
- 15 middle schools in District 3 are screened
- 3 middle schools in District 3 do not have a screen

## Our goal

Together the Superintendent's office, parent and community leaders, and Department of Education staff want to further our work toward the goal that the schools of District 3 reflect the families in the District 3 community.

We want:

- To ensure the schools of District 3 reflect the diversity of the District 3 community
- To consider the impact on District 3 schools and families
- To have support of all District 3 principals
- To begin a multi-year process, in which changes will be continuously reevaluated to ensure they are having positive impact

## Diversity in Admissions Scenario A ENI \& Test Scores

- A District 3 Diversity in Admissions pilot could change the way we run admissions for families applying to middle school for Fall 2019 in an effort to help our schools reflect the diversity of our community
- This scenario prioritizes students from higher-need elementary schools, as well as students who are lower-performing
- $60 \%$ of the weight is based on average Economic Need Index (ENI) of the student's elementary school. (This is a score that is based on the economic needs of a school's students.)
- $40 \%$ of the weight is based on the student's average ELA and math test scores
- Based on these weights students are put into the following groups:
- Group A - from highest-needs elementary school and/or lowest-performing
- Group B - from higher-needs elementary school and/or lower-performing
- This admissions scenario would give a priority at each middle school of
- 10\% of seats to students in Group A
- 15\% of seats to students in Group B
- The remaining $75 \%$ of seats are open to all students

## Estimated Impact of the Scenario A ENI \& Test Scores

Estimated impact on families applying to District 3 middle schools based on 2017 data:

- In 2017, 1,815 families applied to $6^{\text {th }}$ grade
- In a simulation of a District 3 Diversity in Admissions pilot, 1,719 families would receive an offer to one of their choices, compared to 1,737 families who received one of their choices in the $20176^{\text {th }}$ grade admissions process
- 169 students would receive a more preferred offer.
- 109 students would receive a less preferred offer.
- In the $20176^{\text {th }}$ grade process, 78 families did not receive an offer to any school on their application. In this scenario, 96 families would not receive an offer on their application

Estimated impact on the 16 District 3 middle schools:

- In a simulation of a District 3 Diversity in Admissions pilot, we see that 4 schools would come within 10 percentage points of $10 \%$ Group A and $15 \%$ Group B, versus 1 school that meets that today

| Estimated School Impact | 6th 2017 Actual | Modeled Scenario with <br> $10 \%$ priority for Group A and <br> $15 \%$ priority for Group B |
| :--- | :---: | :---: |
| Below $15 \%$ of offers are Group A and Group B | 2 schools | 0 schools |
| $15-35 \%$ offers are Group A and Group B | 1 school | 4 schools |
| Above $35 \%$ offers are Group A and Group B | 13 schools | 12 schools |

## Diversity in Admissions Scenario B Course Grades \& Test Scores

- A District 3 Diversity in Admissions pilot could change the way we run admissions for families applying to middle school for Fall 2019 in an effort to help our schools reflect the diversity of our community
- This scenario prioritizes students who are lower-performing
- $30 \%$ based on final $4^{\text {th }}$ grade ELA course grade
- $30 \%$ based on final $4^{\text {th }}$ grade math course grade
- 20\% based NYS ELA test score
- 20\% based NYS math test score
- Based on these weights students are put into the following groups:
- Group A - lowest-performing
- Group B - lower-performing
- This admissions scenario would give a priority at each middle school of
- $10 \%$ of seats to students in Group A
- $15 \%$ of seats to students in Group B
- The remaining $75 \%$ of seats are open to all students

## Estimated Impact of Scenario B Course Grades \& Test Scores

Estimated impact on families applying to District 3 middle schools based on 2017 data:

- In 2017, 1,815 families applied to $6^{\text {th }}$ grade
- In a simulation of this District 3 Diversity in Admissions pilot, 1,715 families would receive an offer to one of their choices, compared to 1,737 families who received one of their choices in the $20176^{\text {th }}$ grade admissions process
- 194 would receive a more preferred offer
- 135 would receive a less preferred offer
- In the $20176^{\text {th }}$ grade process, 78 families did not receive an offer to any school on their application. In this scenario, 100 families would not receive an offer on their application

Estimated impact on the 16 District 3 middle schools:

- In a simulation of a District 3 Diversity in Admissions pilot, we see that 4 schools would come within 10 percentage points of $10 \%$ Group A and $15 \%$ Group B, versus 1 school that meets that today

| Estimated School Impact | 2017 <br> Actual 6th Grade <br> Admissions | Modeled Scenario with 10\% <br> priority for Group A and 15\% <br> priority for Group B |
| :--- | :---: | :---: |
| Below $15 \%$ of offers are Group A and Group B | 2 schools | 0 schools |
| $15-35 \%$ offers are Group A and Group B | 1 school | 4 schools |
| Above $35 \%$ offers are Group A and Group B | 13 schools | 12 schools |

## Diversity in Admissions Scenario C FRL Eligible, Course Grades, \& Test Scores

- A District 3 Diversity in Admissions pilot could change the way we run admissions for families applying to middle school for Fall 2019 in an effort to help our schools reflect the diversity of our community
- This scenario prioritizes only students who FRL eligible and who are lower-performing
- $30 \%$ based on final $4^{\text {th }}$ grade ELA course grade
- $30 \%$ based on final $4^{\text {th }}$ grade math course grade
- $20 \%$ based NYS ELA test score
- 20\% based NYS math test score
- Based on these weights students are put into the following groups:
- Group A - lowest-performing
- Group B - lower-performing
- This admissions scenario would give a priority at each middle school of
- $10 \%$ of seats to students in Group A
- $15 \%$ of seats to students in Group B
- The remaining $75 \%$ of seats are open to all students

## Estimated Impact of Scenario C FRL Eligible, Course Grades, \& Test Scores

## Estimated impact on families applying to District 3 middle schools based on 2017 data:

- In 2017, 1,815 families applied to $6^{\text {th }}$ grade
- In a simulation of this District 3 Diversity in Admissions pilot, 1,702 families would receive an offer to one of their choices, compared to 1,737 families who received one of their choices in the $20176^{\text {th }}$ grade admissions process
- 185 would receive a more preferred offer
- 137 would receive a less preferred offer
- In the $20176^{\text {th }}$ grade process, 78 families did not receive an offer to any school on their application. In this scenario, 113 families would not receive an offer on their application

Estimated impact on the 16 District 3 middle schools:

- In a simulation of a District 3 Diversity in Admissions pilot, we see that 5 schools would come within 10 percentage points of $10 \%$ Group A and $15 \%$ Group B, versus 2 schools that meet that today

| Estimated School Impact | 2017 Actual 6h Grade <br> Admissions | Modeled Scenario with 10\% <br> priority for Group A and 15\% <br> priority for Group B |
| :--- | :---: | :---: |
| Below $15 \%$ of offers are Group A and Group B | 3 schools | 0 schools |
| $15-35 \%$ offers are Group A and Group B | 2 schools | 5 schools |
| Above $35 \%$ offers are Group A and Group B | 11 schools | 11 schools |

## Comparing Scenarios A, B, and C

## State Test Performance

- In Scenario A (ENI), 78\% of students in Groups A and B scored a L1 or L2 on their state tests.
- In Scenario B (Course Grades), 92\% of students in Groups A and B scored a L1 or L2 on their state tests.
- In Scenario C (FRL \& Course Grades), 88\% of students in Groups A and B scored a L1 or L2 on their state tests.

## Student Offers

- In all three simulations, $\sim 5 \%$ of applicants did not receive a match to a school they ranked on their application.
- All simulations had a net increase in families receiving a match to a more preferred school.

## Estimated Impact of Scenario A ENI \& Test Scores

| School DBN | School Name | Offers for <br> fall 2017 <br> admissions | \% of Group A \& B students in fall 2017 admissions | \% of Group A \& B students in simulation | Change in Group A \& B students | Change in remaining students |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
